

and it will be useful to see what vaccination your puppy has had in the past,

Until your puppy is fully vaccinated, you should not take it anywhere where it might come into contact with dogs or ground that may be infected. However, puppies are most receptive to new environments and situations at this age, so keeping them confined to your house and garden can be counter productive. In order to continue your puppy's socialisation programme during these important first weeks at home, you should take your puppy out to different places in your arms or the car to get it used to different situations and noises, as well as letting it meet new people.

Further details on socialisation is available in the Kennel Club "Puppy Plan" which can be viewed at [www.thepuppyplan.com](http://www.thepuppyplan.com)
